### Technical Parameters

| No. | Parameter              | Description                         |
|-----|------------------------|-------------------------------------|
| 1.  | Fabric technical name: | Blockout Matt 610gsm                |
| 2.  | Type of fabric:        | High tenacity yarns 100% PES (500D) |
| 4.  | Fabric weight:         | ± 610 g/m <sup>2</sup>              |
|     | Maximum print width    | Up to 5M/197"                       |
| 5.  | Weave Method           | Weaving 28*28                       |
| 6.  | Weight of fabric       | 120 g/m <sup>2</sup>                |
| 7.  | Weight of pvc coating  | 490 g/m <sup>2</sup>                |
| 8.  | Tensile strength       | Warp: 1850 N/5cm, Weft: 1350 N/5cm  |
| 9.  | Tearing strength       | Warp: 235 N, Weft: 220 N            |
| 10. | Suitable temperature   | -20 / +70°C                         |

## Blockout Coated

Blockout Matt 610gsm is a heavy-duty blockout banner material designed for high-impact visual communication in indoor and outdoor environments. Its opaque structure prevents light transmission, ensuring consistent image visibility from one side without show-through.

The material offers excellent dimensional stability and resistance to mechanical stress, making it suitable for long-term advertising installations such as billboards, building graphics, and large-format promotional displays. It provides a smooth matte surface for clear, professional-looking prints and reliable performance in demanding conditions.

### Printing technology:

|                        | Direct sublimation | Transfer sublimation | UV                              |
|------------------------|--------------------|----------------------|---------------------------------|
| Printing compatibility | ✗                  | ✗                    | ✓<br>single-sided, double-sided |

### Compatible product

Banner

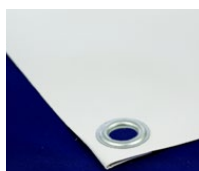

### Standard Finishing

Tunnel

Band (On Back)

Edge Reinforcement  
+ Eyelet

Keder 8,5 Mm
